Profile

I Graduated high school having done stem subjects, did two academic years in the University of Cape Town taking on the Bachelor of Science degree in Physics and Astrophysics. I was then financially excluded after my second year. I have shown to be good at interacting with people and working well with a team in a job I took on as a dining hall monitor and after volunteering as a mentor in The University of Cape Town. I have also developed my computer skills in the Microsoft technologies in order to better serve in a professional environment. I have also developed my communication skills and my computer skills through university, online courses and work experience. I am always looking to add more skills and gain competence in the workplace. I am looking to expand my skills and make a great career for myself in the electrical engineering field. I am looking to create a long-term career for myself and I would be eternally grateful for an opportunity to build one.
